VET4GREEN
Developing Capacities in the Area of VET for
Green Energy Transition in Sub-Saharan Africa

Purpose

- ✓ fostering cooperation between international partners
- ✓ creating and developing networks between VET providers in Europe and Africa
- ✓ exchange information about the organisation of labour-market oriented VET courses
- ✓ exchange approaches and best practices of Europe to the African partners to benefit the local green energy sector
- ✓ developing the VET courses that match the actual requirement of the labour market (green energy sector companies)

Green Energy Transition in Sub-Saharan Africa

Participant Introductions

Think of **three things** that best describe you, that are important to you or that characterize you in some way. Bring them in front of the screen, show us (or draw) and tell us how they relate to you.

Developing Capacities in the Area of VET for
Green Energy Transition in Sub-Saharan Africa

Formulating an Action Plan

1. Divide into groups.
2. Chose team-lider (for organizing group work, giving the floor if needed, taking notes, etc.).
3. Tell one by one about the organisation of labour-market oriented VET courses in your country and best practises in developing VET courses in green energy sector.
4. Create a model of „ideal” VET course to benefit the local green energy sector taking into account the above considerations. You can use diagrams, mind maps, descripiton etc. – use whatever technique you want.
5. Think about the obstacles in implementing in your country the model that you have worked out.
6. Present the results of the group's work to everyone.

11:20-
12:45
